## LEGALIZATION

A thesis by Riski Saputri NIM 15.1.16.0011 entitled "Analysis of English Pronunciation at 8<sup>th</sup> Grade Students of SMP Astra Makmur Jaya in Tikke Raya" which has been examined by the examiner council of Teacher Training and Tarbiyah Faculty State Institute of Islamic Palu on the date 29 September 2020 M which coincide with the date 11 safar 1442 H. It can be seen that the thesis has already fulfill the criteria of scientific writer and can be accepted as the regulations to require Sarjana Pendidikan (S.Pd) English Tadrис Department with some of the corrective.

## **ACKNOWLEDGEMENT**

*Bismillahirrahmanirrahim*

*Alhamdulillahirobbilalamin*

First and foremost, the researcher would like to express her confession and gratitude to the Most Perfect, Allah subhanawata'ala for giving the strength, knowledge, ability and opportunity to undertake this research study and to persevere and complete it satisfactorily. Without His blessing, this achievement would not have been possible.

May shalawat and salam be with our prophet Muhammad Saw., peace be upon him. The most excellent worshipper, supreme, among a prophet who has guided us from darkness to the lightness in this world as well as next world. There has been a good example for your model in the Messenger of Allah subhana wata'ala for those who hope in Allah subhana wata'ala and the last day, the people who remember Allah subhana wata'ala much.

The researcher has gone through a long journey in order to complete the writing of this thesis. Many obstacles faced in its preparation, but thanks to all those who have helped in the preparation of this thesis, especially to:

1. Both parents, beloved father Hamsan and beloved mother Murniati who always send their pray to Allah S.W.T for the successful of the researcher itself. Who have provided support both morally and materially.
2. Prof. Dr. H.Sagaf S. Pettalongi, M.Pd. as the rector of Institute of Islamic Studies Palu. With his ability to build IAIN Palu arise from the disaster.
3. Dr. Mohamad Idhan, S.Ag., M.Ag as the dean of Institute of Islamic Studies Palu. With his charitable help students at IAIN Palu in solving their problems.
4. Dr. Hj. Nur Asmawati, S.Ag., M.Hum as the chairwoman of Tadris English Education at IAIN Palu and also as the first supervisor of the researcher. With her fully affection guided the writer in order to write the thesis as well.
5. Fitri Ningsih, S.S., S.Pd., M.Humas the second supervisor of the researcher. With indepth knowledge guiding the researcher so that the researcher can be better in the writing process and always support the researcher.
6. Abd. Majid, S.Pd. Ias the headmaster of SMP Astra Makmur Jaya. With his sincerity gave chance to the researcher in order to do observation at the school.
7. The researchers' classmate TBI First Batch 2015 for being the best support system for the researcher from the first semester until now.
8. Several friends of the researcher that has big role in order to arise the researcher's spirit: especially Sandi Yamadi, Safriana S.Pd., Nadia Bachmid S.Pd., Ulul Azmi S.Pd., Devitasari, Istiqomah, and all of her friend whose names could mentioned one by one. Thank you for the friendship, togetherness and suggestions to the researcher.

The researcher realizes that this thesis far from perfect because of the experience and knowledge possessed by the researcher. Therefore, expect all forms of suggestions and constructive criticism input from various parties. Hopefully this thesis can be useful for readers and all parties.

## ABSTRACT

Name : Riski Saputri  
NIM : 15.1.16.0011  
Title : Error Analysis of English Pronunciation at 8<sup>th</sup> Grade Students of SMP Astra Makmur Jaya in Tikke Raya.

---

This study aims to analyze the error pronunciation skill of Astra Makmur Jaya Junior High School students. The specific purpose of this research is to identify the error pronunciation of words in English and find out what causes the error. The results of this study expected to provide practical benefits for the community concerned.

This research is a descriptive qualitative research which is a procedural study that produces descriptive data in the form of written words or words from people who can be observed. The subjects of this study were 8<sup>th</sup> grade students of SMP Astra Makmur Jaya. The researcher collected data by giving tests to students one by one, each student given the same test.

Researcher found that there were errors in pronouncing English vowels. The percentage of English vowel errors, as follows; / ə / 25,27%; / i / 2,26%; / u / 4,61%; / ʌ / 15,38%; / ɪ / 12,22%; / e / 1,53%; / u: / 2,23%; / i: / 5,59%; / ɑ: / 5,76%; / æ / 0,76%; / ɒ / 3,07%; and / ɔ: / 1.53%. The results showed that the participants made three types of pronunciation errors; substitution, insertion, and omission.

Researcher suggest helping students by providing a lot of exercises and practices related to pronunciation and also increasing it for listening so that they can get used to using correct pronunciation.

**Key words: analysis error, pronunciation**

# CHAPTER I

## INTRODUCTION

This chapter copes with background, problem statement, objective of research, the significance of research, and definition of key terms.

### *A. Background*

Language has an important part in our communication people need to communicate to each other. English as foreign language has been established as important in the world. As an international language, English is very important to make one become successful in mastering science and technology, which is why we still need English language. Communication is a process of teaching mutual understanding, in which participants not only exchange information, news, ideas, and feelings but also create and share meaning.

Pronunciation is the way in which a word or a language is spoken. This may refer to generally agreed-upon sequences of sounds used in speaking a given word or language in a specific dialect ("correct pronunciation"), or simply the way a particular individual speaks a word or language. A word can be spoken in different ways by various individuals or groups, depending on many factors, such as the duration of the cultural exposure of their childhood, the location of their

current residence, speech or voice disorders, their ethnic group, their social class, or their education.<sup>1</sup>

Even though Indonesian students have been learning English for six until twelve years or more, they still could not express their thought in English correctly because there must be some reasons which bring failure of them in mastering English, especially in pronunciation. The failure originated from difficulties in learning foreign language is caused of the differences between the students' mother tongue and English as target language. That the differences make the students produce so many errors in pronouncing English. Brown state in relation with speech community finds that a second language learner meets some difficulties, because his first language affects his second language specially in adulthood, and this effect is a result of first language transfer; so it is a significant source of making errors for second language learners. As we know that pronunciation is one of three components of language that support the language skills. Teaching English pronunciation has a goal to create intelligibility in learner's speech when they are speaking. Intelligibility is needed when someone speaks a certain language. Speaker speaking must be understandable so the listener will understand toward what speaker talking about. At the time when the speaker has a good pronunciation in speaking, the communication is built between the speaker and the listener. A lot of errors made by the students

---

<sup>1</sup> Pengertian pronunciation. <https://en.wikipedia.org/wiki/Pronunciation>. accessed 27 august 2019.

especially to produce English vowels and English consonant in initial and middle position. And the problem made by the students need to solve.

In this case the researcher found that the students problem when the researcher observed in one Junior High School. The researcher had asked the English teacher about the problem that students have, the English teacher said the problem of the students is in pronunciation. And then the researcher gave the student some word and they pronounce the word, the students only pronounce the word as they know. Base on the words that the students pronounce, it can be concluded that the students only try to pronounce the words did not based on the speaker. Based on the background above, the researcher formulated the title *Error Analysis of English Pronunciation at 8<sup>th</sup> Grade Students of SMP Astra Makmur Jaya*.

### ***B. Research Questions***

1. What kinds of errors made by the 8<sup>th</sup> grade students of SMP Astra Makmur Jaya in pronouncing English words?
2. What are the causes of error in pronouncing English words by the 8<sup>th</sup> grade students of SMP Astra Makmur Jaya?

### ***C. Objective of Research***

1. To investigate errors in pronouncing English words by the 8<sup>th</sup> grade student of SMP Astra Makmur Jaya.
2. To classify the cause of error in pronouncing English words by the 8<sup>th</sup> grade students of SMP Astra Makmur Jaya.

### ***D. Significance of Research***

The research is expected to have contributions for :

1. Teacher

To help them to find out the students' difficulties in pronouncing English word in order to gain knowledge for teacher to teach their students well in english pronunciation.

2. Student

They are able to know their weakness in order that be easily to solve them. They will learn from the mistakes they make in the pronunciation of words.

3. Researcher

To increase knowledge of pronunciation. This research may be a reference for researcher who will conduct a similar research for the future time.

### ***E. Definition of Key Terms***

#### 1. Pronunciation

Pronunciation is refers to the way in which we make the sound of words.

#### 2. Supra segmental feature

A supra segmental is a vocal effect that extends over more than one sound segment in an utterance is like intonation, stress, and linking.

#### 3. Segmental feature

Segmental feature is the individual sounds (phonemes) of a language vowel and consonant.

#### 4. Error analysis

Error analysis is a way we identify errors that occur in second language learning to determine the level of difficulty of students in communication.

## CHAPTER II

### REVIEW OF RELATED LITERATURE

This chapter present and describe various concepts and perspectives through literary reviews. In order to assist better understanding about the concepts, this chapter is divided into (A) Previous Related Studies, (B) Some Pertinent Ideas which consist of error analysis and pronunciation.

#### *A. Previous Related Studies*

In this study there were three related studies that discussed error analysis in pronunciation. The related study includes.

I Dewa Ketut Sidanes (2016) in their jurnal entitled *The Errors In Pronouncing Vowels And Consonants In Reading English Medical Text By The Second Year Students Of Stikes Bali*. The analysis shows that the students tended to produce the errors in pronouncing vowels /ə/, /ɪ/, /ʌ/, /i:/, /e/ and /ɔ:/; as far as consonants are concerned, the students tended to produce errors in /dʒ/, /θ/ and /f/. The errors produced by the students resulted from the interference of the student's first language and competence in learning English.<sup>2</sup>

Julia Puascunder (2018) entitled *English Pronunciation Errors Made by Saudi Students*. The findings of this study reveal that Saudi students struggle and

---

<sup>2</sup> Ketut Sidanes, 2016, *The Errors in Pronouncing Vowel and Consonants in Reading English Medical Text by the Second Year Students of Stikes Bali*: jounalonline.

confuse mainly the vowel sounds with another one or two phonemes vowel sounds such as the /e/ with /i/, /ie/, /ae/; the /i/ sound with /ε, ai, ei, ai/; and the /a/ sound with the /e, ε, æ/. Also, the students have problems with missing sounds in Arabic such as the /p v/ sounds and often replace them with the /b f/ English sounds. In addition, the students completely missed the stress or intonations on two or more syllabi words and imitated the Arabic /r/ sound by added an extra stress on the English /r/ sound.<sup>3</sup>

Novalina and Fiber Yun (2016) entitled *An Analysis of Pronunciation Errors Made by the Fourth Semester Students of English Education Study at UNIKA*. The result from the recorded tape showed that there are 193 errors in pronouncing the consonants with the percentage 32%, 104 errors in pronouncing the vowels with the percentage 31% and 54 errors in pronouncing the diphthongs with the percentage 32 %. The pronunciation errors made by the students both in the oral and written test are due to the unfamiliarity with the words, lack of practicing English words and lack of understanding the phonetics and pronunciation subjects.<sup>4</sup>

---

<sup>3</sup> Puascunder Julia, 2018, English Pronunciation Error Made By Saudi Students: journalonline.

<sup>4</sup> Yun Fiber, Novalina, 2016, An Analysis of Pronunciation Error Made by the Fourth Semester Students of English Education Study at UNIKA: journalonline.

All the research findings above consist of to identify the kinds of error in consonant, vowel, and diphthongs only. Therefore the researcher in this research to investigate the error in supra segmental and segmental feature including intonation, linking, stress, vowel, and consonant.

### ***B. Some Pertinents Ideas***

In this chapter, the researcher has been explaining several theories through reviewing some literatures related to this study. This theoretical construct deals with two main areas: Error analysis and pronunciation.

#### **1. Error Analysis**

The study of learners' errors and analysis are called error analysis. According to Brown, "The fact that learners do make errors and that these errors can be observed, analyzed, and classified to reveal something of the system operating within the learner, led to a surge of study of learners' errors, called error analysis."<sup>5</sup>

##### *a. Definition of Error Analysis*

Error analysis is a branch of applied linguistics. It is concerned with the compilation, study and analysis of errors made by second language learners and aims at investigating aspects of second language acquisition. James distinguish Error analysis from transfer analysis, which compares the learner's data with the

---

<sup>5</sup> H. Douglas Brown, *Principles of Language Learning and Teaching*, (New York: Pearson Education Company, 2000), p. 218.

respective first language, whereas error analysis compares the learner's data with the target language norm and identifies and explains errors.<sup>6</sup>

Learning a language is fundamentally a process that involves making mistakes or errors. The mistakes include vocabulary items, grammatical pattern, and sound patterns as well. Errors in a foreign language teaching especially in English are the cases which are difficult to avoid. Jeremy Harmer stated, "Errors are parts of the students' inter-lingual that is the version of the language which a student has at any one stage of development". The fact that the students make errors and these errors can be observed and classified led to a surge of the study of students' errors can be analyzed.<sup>7</sup>

In learning foreign language students often makes error, error that occur indicate that students have not mastered that rules of the foreign language that are they learning. Error analysis is an activity to reveal errors found in writing and speaking. Error analysis also is the study of errors made by the second and foreign language learners. Error analysis may be carried out in order to (a) find out how well someone knows a language, (b) find out how a person learns a language, and (c) obtain information on common difficulties in language learning,

---

<sup>6</sup>James, C. 1998. Errors in language learning and use: Exploring error analysis. New York: Longman..accessed 1 august 2019.

<sup>7</sup> H. Douglas Brown, 1994. Principles of Language Learning and Teaching, p. 259.

as an aid in teaching or in the preparation of teaching materials. This definition stresses the functions of error analysis.<sup>8</sup>

Davis and Pearse state that ‘errors are integral part of language learning and not evidence of failure to learn’. Those errors should be analyzed because they give a contribution in understanding the process of language learning. From their errors, learners can get feedback which can be used to find new attempts to achieve the goal of learning. It contains information on strategies that learners use to acquire language and can play an important role in the study of foreign language.<sup>9</sup> Brown assumes error analysis as the process to observe, analyze, and classify the deviations of the rules of the second language and then to reveal the systems operated by learner.<sup>10</sup>

Based on the explanation above, error analysis is a way we identify errors that occur in second language learning to determine the level of difficulty of students in pronouncing word.

*b. Kinds of Error*

Corder states that errors are natural part of learning a language and can work as an insight into the tools and the process used to learn a language. One of the most important findings of errors analysis is that most errors occur by learners

---

<sup>8</sup> J.C Richards, *Error Analysis: Perspective in Second Language Acquisition*. Longman. 1947.

<sup>9</sup> Paul Davies, Eric Pearse, *success in English teaching* (Shanghai: foreign language Education 2002), 103

<sup>10</sup> H.D. Brown, *Principles of Language Learning and Teaching*.(New Jersey: Prentice-Hall Inc, 1980), 166

drawing incorrect conclusion about the rules of the second language. He classifies the errors into four different categories. The categories are addition, omission, selection, and ordering.

1) Addition

Addition refers to the addition of any grammatical item or where some elements is present that should not be there. E.g. \*The sparrows is flying. Here is the addition of morpheme “s” with sparrow that is not required. The true construction is: The sparrow is flying.

2) Omission

Omission occurs when the linguistic item that is required in the sentence is omitted or where some elements is omitted that should be present. E.g. \*He go to school. Here the morpheme “es” is omitted that was required for the correct construction of the sentence.

3) Selection

Selection refers to the problem of wrong selection of the certain forms or where the wrong item has been chosen in place of the right one. E.g. I am biggest than her. Here, the superlative degree is used instead of the comparative degree and it is the example of wrong selection of the degree of adjective.

4) Ordering

Ordering refers to the wrong order of the words in the sentence or where some elements presented are correct but these are wrong in sequence.

E.g. He is a dear to me friend. Here the order of the sentence is incorrect and is becoming the reason of error.<sup>11</sup>

*c. Causes of Error*

Norrish classifies causes of error into three types that is carelessness, first language interference, and translation. The three types of causes of error will be discussed briefly below.

1) Carelessness

It is often closely related to lack of motivation. Many teachers will admit that it is not always the student's fault if he loses interest, perhaps the materials and/or style of presentation do not suit him.

2) First language

Norrish states that learning a language (a mother tongue or a foreign language) is a matter of habit formation. When someone tries to learn new habits the old ones will interfere the new ones. This cause of error is called "first language interference".

3) Translation

It is one of the causes of error. This happens because a student translates his first language sentence or Idiomatic expression in to the target language e word by word. This is probably the most common cause of error.<sup>12</sup>

## 2. Pronunciation

### a. *Definition of Pronunciation*

Kelly explains that the pronunciation is when we use all the same organs of speech to produce the sounds in a particular way. Furthermore, pronunciation is the way in which a word is pronounced. Pronunciation is not an optimal extra for the learners anymore than grammar, vocabulary or any other aspect of language.<sup>13</sup> Kristina et al note that pronunciation is the act or manner of pronouncing words utterance of speech. In other words, it can also be said that it is a way of speaking a word, especially a way that is accepted or generally understood. In the senses, pronunciation entails the production and reception of sounds of speech and the achievement of the meaning.<sup>14</sup> On the other hand Hornby state that pronunciation is the way in which language spoken, the way in which the word pronounced, the way a person speaks the word of language.<sup>15</sup>

### b. *Problems of Pronunciation*

There are several factors influencing the pronunciation. Those are, the first language interference by interference of mother language, learner's age, learner's attitude and psychological, prior pronunciation instruction, and the insufficient language knowledge of English phonology and phonetics. Most researchers agree

---

<sup>13</sup> Kelly. 2000. *How to Teach Pronunciation*. London: Essex Longman.

<sup>14</sup> Kristina et al. 2006. *Pronunciation 1*. Surakarta: Sebelas Maret University Press.

<sup>15</sup> Albert Sidney Hornby. 2000. *Oxford Advanced Learners' Dictionary*. New York: Oxford University Press.

that the learner's first language influences the pronunciation of the target language and is a significant factor in accounting for foreign accents. So called interference or interference from the first language is likely to cause errors in aspiration, stress, and intonation in the target language.

*c. Element of Pronunciation*

Yates point out a broad definition of pronunciation includes both supra segmental and segmental features. Although these different aspects of pronunciation are treated in isolation here, it is important to remember that they all work in combination when we speak, and are therefore usually best learned as an integral part of spoken language.<sup>16</sup>

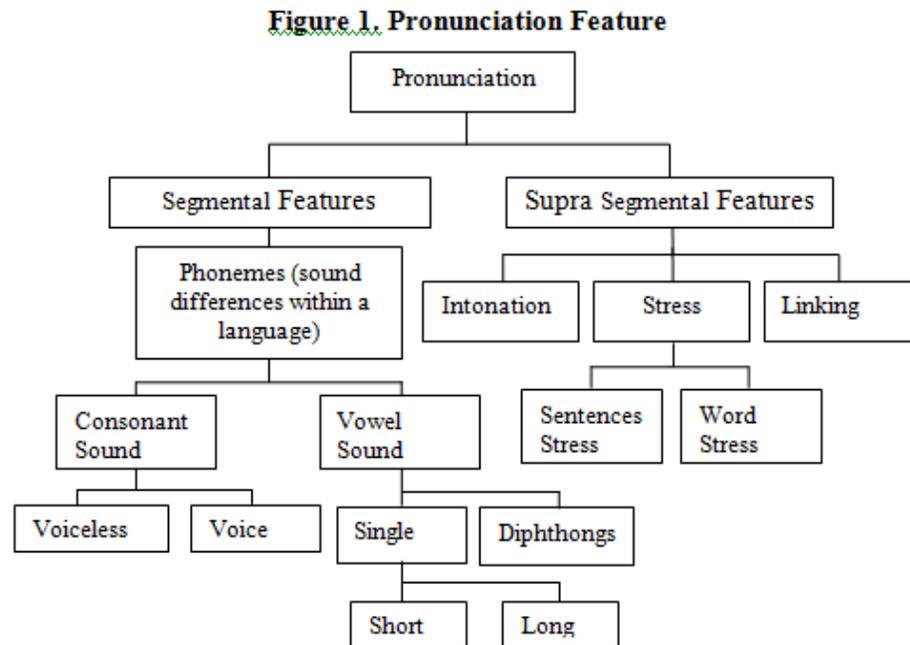

As what has been stated in the importance of pronunciation that the speaker of English, native or non-native speaker, should be able to exchange meaning effectively. According to Burns it is important for the English speakers to achieve:

- 1) Intelligibility (the speaker produces sound patterns that are recognizable as English).
- 2) Comprehensibility (the listener are able to understand the meaning of what is said).

---

<sup>16</sup> L. Yates. (2002). Fact Sheet - What is pronunciation? Adult migrant English.

- 3) Interpretability (the listener is able to understand the purpose of what is said).<sup>17</sup>

**Figure 1. Pronunciation Feature**

From the diagram above it can be seen that pronunciation involves two types of features they are the segmental features and the supra-segmental features. Knowing supra-segmental and segmental aspects of pronunciation is one of the criteria in order to make the learners learn easily. They also produce understandable and comprehensible meaning. Both supra-segmental and segmental features need to be learned because they are crucial in order to master pronunciation.

---

<sup>17</sup> Burns. 2003. Clearly Speaking Pronunciation in Action for Teachers. Sydney: The National Centre for English Language Teaching and Research Teachers. Macquire university.

## 1) Supra Segmental Features

Supra segmental features as the name implies are features of speech which generally apply to groups of segments or phonemes. The features which are important in English are stress, intonation and how sound changes in connected speech.<sup>18</sup>

A supra segmental is a vocal effect that extends over more than one sound segment in an utterance, such as pitch, stress, or juncture pattern. Supra segmentals are important for marking all kinds of meaning, in particular speakers' attitudes or stances to what they are saying (or the person they are saying it to), and in marking out how one utterance relates to another (e.g. a continuation or a disjunction). Both the forms and functions of supra segmentals are less tangible than those of consonants and vowels, and they often do not form discrete categories.<sup>19</sup> Here are three types of supra segmental features:

### a) Linking

Linking is the merging of multiple words together until they sound as if they are only one word. Linking is an advanced topic for non-native speakers, but learning to correctly link words can result in significantly more fluid and fluent sounding English speech. Failing to

---

<sup>18</sup> Kelly, *op.cit.* page 13.

<sup>19</sup> Richard Ogden, *An Introduction to English Phonetics*. Edinburgh University Press, 2019.

link words naturally results in spoken English which may have awkward pauses, extra, unnecessary sounds, and which will sound very foreign to native speakers.<sup>20</sup> For Example, when the [t] and [j] sounds assimilate, they merge into a [tʃ]. "don't you" → "donchou". When the [d] and [j] sounds assimilate, they merge into a [dʒ]. "did you" → "dijou". In the phrase "this month," the [s] blends smoothly into the [m]. "this month" → "thismonth".

#### b) Intonation

Fraser state Intonation or change of pitch is crucial in signaling speaker meaning, particularly interpersonal attitudes. As we saw in the previous section, pitch changes are crucially linked with stress. Since into-nation patterns are language specific, learners will need to acquire new ones for English in order to avoid inappropriate transfer from their first language, and thus perhaps inadvertently causing offence.<sup>21</sup>

#### c) Stress

Kelly state all of words have each identifiable syllable, and one of the syllables in each word will sound louder than the others. The syllable indicated with louder sounds, are the stressed syllable. Each

---

<sup>20</sup>Linking in Phonetics (Linguistics). <https://www.slideshare.net/MuhammadAsad353/linking-in-phonetic-linguistic>.

<sup>21</sup> Fraser H. Teaching pronunciation: A handbook for teachers and trainers. Canberra: Department of Education Training and Youth Affairs: <http://www.detya.gov.au/ty/litnet/resources.htm> (2001).

stressed syllable, in a word in isolation, also has change in the pitch, or the level of the speaker's voice, and the vowel sound in that syllable lengthened. Syllable can fall on the first, middle or last syllable of words.<sup>22</sup>

It might be concludes stress is pressure of word, the word consist of two or more syllable and every word has one stress syllable only.

There are two types of stress:

#### (1) Word Stress

In English every polysyllabic word has one stressed syllable. Every stressed syllable is emphasized. It can be longer, louder, and higher in pitch than the others. It stands out from the others.

#### (2) Sentences Stress

Just as every polysyllabic word has one strongly stressed syllable, every sentence or clause has one syllable, that strongest stress.

### 2) Segmental Features

According to Fraser the sound system of English is made up of phonemes, or individual sounds which carry the potential to make

---

<sup>22</sup> Kelly, *op.cit.* page 13

meaning, and these may be vowels, diphthongs (combinations of two vowel sounds), triphthong (combinations of three vowel sounds) or consonants. These sounds are made using our tongue in different parts of the mouth.<sup>23</sup>

Segmental feature is the individual sounds (phonemes) of a language vowel and consonant. Spoken languages are the vowels and the consonants which combine to produce syllables, words and sentences.

#### 1) Consonant

Davis Odden explains that term consonant is negatively defined, that is, sounds which are not vowels are consonants. There are 24 consonants in English, those are: p, b, t, d, k, g, f, v, s, z, ʃ, ʒ, tʃ, dʒ, θ, ð, m, n, ŋ, h, i, r, w, and j. Consonants are made by causing a blockage or partial blockage in the mouth, and these are usually described in terms: where the sound is made in the mouth, or place of articulation, how the sound is made, or the manner of articulation and whether or not the vocal cords vibrate, or voicing.<sup>24</sup>

Consonants are made by causing a blockage or partial blockage in the mouth, and these are usually described in terms: where the sound is made in the mouth, or place of articulation, how the sound is

---

<sup>23</sup> Fraser, *op.cit.*, page 17

<sup>24</sup> David Odden. 2005. *Introducing Phonology*. New York: Cambridge University Press.

made, or the manner of articulation and whether or not the vocal cords vibrate, or voicing.

It can be one of the speech sounds or letters of the alphabet that is not a vowel. Consonants are pronounced by stopping the air from flowing easily through the mouth, especially, by closing, the lips or touching the teeth with the tongue.

(a) Voice

Voice sound is when the vocal cords vibrate. Your vocal cords, which are actually mucous membranes, stretch across the larynx at the back of the throat. By tightening and relaxing as you speak, the vocal cords modulate the flow of breath expelled from the lungs. An easy way to determine whether a consonant is voiced or not is to place a finger on your throat. As you pronounce a letter, feel the vibration of your vocal cords. If you feel a vibration the consonant is a voiced one. These are the voiced consonants: B, D, G, J, L, M, N, Ng, R, Sz, Th (as in the word "then"), V, W, Y, and Z.

(b) Voiceless

Voiceless sounds do not use the vocal cords to produce their hard, percussive sounds. Instead, they're slack, allowing air to flow freely from the lungs to the mouth, where the tongue, teeth,

and lips engage to modulate the sound. These are the voiceless consonants: Ch, F, K, P, S, Sh, T, and Th (as in "thing").

p	b	t	d	f	v	θ	ð
/pin/	/bæd/	/tɪn/	/dɒg/	/faɪv/	/væn/	/θɪn/	/ðæt/
pin	bad	tin	dog	five	van	thin	that
m	n	ŋ	h	tʃ	dʒ	k	g
/mæn/	/nəʊz/	/θɪŋ/	/hɑ:f/	/tʃɜ:tʃ/	/dʒæm/	/kaɪnd/	/gʌn/
man	nose	thing	half	church	jam	kind	gun
s	z	ʃ	ʒ	l	r	w	j
/seɪ/	/zu:/	/ʃɪp/	/meʒə/	/leg/	/rʌn/	/wɜ:k/	/jes/
say	zoo	ship	measure	leg	run	work	yes

**Figure 2. Consonant Sound**

## 2) Vowel

According to Oxford dictionary vowel is speech sound in which the mouth is open and the tongue is not touching the top of the mouth, the teeth, etc.<sup>25</sup> Vowels are usually described in terms of: length, although remember that length depends on stress, and that even short vowels in English may seem rather long when stressed the position in the mouth in which they are made (in terms of their

<sup>25</sup> Oxford Dictionary (2000:483)

position from high to low and front to back) and the degree to which the lips are rounded, spreader neutral.

It might be conclude vowel is a speech sounds produce by humans when the breath flows out through the mouth without being blocked by the teeth, tongue, or lips.

1 i: need	2 ɪ thɪn	3 e went	4 æ cat	13 eɪ pɛɪ	14 ɔɪ nɔɪs	15 aɪ fɪŋ
5 ə alɪv	6 ɜ: θɜ: third	7 ʌ fʌn	8 ɑ: glɑ: glass	16 əʊ nəʊ	17 aʊ raʊnd	
9 u: fɛw	10 ʊ pʊt	11 ɔ: tɔ: talk	12 ɒ rɒb	18 ɪə biə	19 eə keə	

**Figure 3. Vowel Sound**

(a) Single,

Single vowel sound is any vowel that is not a diphthong. A single vowel can be short or long.

(1) Short vowel

This is the list of the short vowels in standard (RP)

English:

/ɪ/ as in *ship*, /ʊ/ as in *book*. /e/ as in *egg*, /æ/ as in *cat*, /ʌ/ as in *cup*, /ɒ/ as in *hot*

**Schwa** - /ə/ → The schwa is a special type of short vowel. It is a very "weak" sound that is never stressed. This means you

often find the schwa in words with more than one syllable.

Here are some examples:

mother: /'mʌðə/      America: /ə'merɪkə/

## (2) Long vowel

In the British English phonemic chart, long vowels are easy to recognize, because they have a colon (":") symbol after them. Some long vowels are basically longer versions of short vowels (like /ɪ/ and /i:/). Long vowels in English:

**/i:/** as in sheep      **/ɔ:/** as in door      **/ɜ:/** as in learn

**/u:/** as in boot      **/ɑ:/** as in car

## (b) Diphthongs

Diphthong is two vowel sounds, one after the other. There is movement or "glide" between the two parts of the sound. For example, to say the /eɪ/ diphthong, like in the word "cake" (/keɪk/) first say /e/, then say /ɪ/ without stopping. Your mouth will move from the /e/ shape to the /ɪ/ shape. This is the "glide".

## CHAPTER III

### RESEARCH METHOD

This chapter discusses some important aspects related to research methodology. There are research method, place and time of research, subject of the research, the technique of data collecting, instruments of research, procedure of collecting data, and the technique of analysis data.

#### ***A. Research Method***

This research is a qualitative descriptive research, namely data collected in the form of words, pictures, not numbers. 1 According to Bogdan and Taylor, as quoted by Lexy J. Moleong, research qualitative is a research procedure that produces data descriptive in the form of written or spoken words from people and observed behavior.<sup>26</sup>

Meanwhile, descriptive research is a form of research aimed at describing or describe the existing phenomena, either natural phenomena and human engineering.<sup>27</sup>

The purpose of descriptive research is to make descriptions in a systematic, factual, and accurate manner regarding the facts and nature of a particular population or area. This study was used to determine how the implementation of English language learning in SMP Astra.

---

<sup>26</sup> Lexy. J. Moleong, *Metodologi Penelitian Kualitatif*, (Bandung: PT Remaja Rosdakarya, 2000), hlm. 3

<sup>27</sup> Lexy. J. Moleong, *Metodologi Penelitian Kualitatif*, hlm. 17

## ***B. Population and Sample***

### **1. Population**

The population of this research was the 8<sup>th</sup> grade students of SMP Astra Makmur Jaya in Tikke Raya in academic year 2019/2020. The total of population is 70 students. Devided in 3 calsses.

### **2. Sample**

In this research there are 13 sample. The researcher used non probability sampling that is accidental sampling. Sugiyono state accidental sampling is a technique of determining a sample based on chance, that is anyone who accidentally meets a researcher can be used as a sample if that person is deemed suitable as a data source.<sup>28</sup> In taking sample, the reseacher simply takes the nearest students as the subject of the research. As Guilford and Fructer from Calmorin & Calmorin, describe as incidental sampling which is applied to those sample which are taken because they are the most available.<sup>29</sup>

## ***C. Place and Time of Research***

This research had been conducted at SMP Astra Makmur Jaya which is located at Makmur Jaya, Tikke Raya, Kabupaten Mamuju Utara, Sulawesi Barat.

---

<sup>28</sup> Sugiyono 2009. Accidental Sampling, 85

<sup>29</sup> Calmorin, L. P. & Calmorin, M.A (2008) Research Methods and Thesis Writing (2<sup>nd</sup>ed). Philippine: Rex Book Store.

The researcher was the alumni of the school. The school is also near with the researcher's house so it easy to do the research.

The researcher did the small observation at SMP Astra Makmur Jaya. The researcher asked some of the students how to pronounce word with their own. The students just pronounce the word as they know, not base on the native speaker.

#### ***D. Subject of Research***

This research had been conducted on eight grade student of SMP Astra Makmur Jaya by focusing on Error Analysis of Pronunciation. The researcher chose only one class from 8<sup>th</sup> grade students for sample, to be analyzed in this research.

#### ***E. Technique of Data Collection***

According to Arikunto are methods that can be used by researchers to collect data, which way shows in an abstract, cannot be manifested in objects which is visible to the eye, but can be demonstrated its use.<sup>30</sup>

In this research collecting data involve directly on the object of research to get data valid, the researcher used the following methods:

---

<sup>30</sup> Suharsimi Arikunto, *Prosedur Penelitian Suatu Pendekatan Praktek*, (Jakarta : PT. Rineka Cipta, 2002, Cet.XII), hlm. 134.

## 1. Observation

Observation can be defined as observing and recording systematically the symptoms that appear on the object of research. This observation used participatory observation, in which the researcher is directly involved with the daily activities of the person being observed or who is used as a source of research data.<sup>31</sup>

The researcher uses direct observation to know the classroom situation when teaching learning process, how the teacher taught in the class, and facilities that support teaching learning process. Also, the researcher asking the teacher about the student's difficult in learning English, especially in pronunciation.

## 2. Test

The test is a series of data collection techniques that researchers used in their research. The test used in this study was to provide reading material to the students in the form of a conversation test available on the learning device (hand book).

One by one student asked to come in front of the class to read the dialog tests that are available, to find out the types of errors that students make in reading the dialog text given by the researcher. Besides reading the

---

<sup>31</sup> Sugiyono, Metode Penelitian Pendidikan; Pendekatan Kuantitatif dan Kualitatif dan R&D , (Bandung: Alfabeta, 2006), hlm. 310.

text in front of the class. Before the students doing the test, the researcher gives a little explanation about the instruction for doing the test.

### 3. Interview

Interviews are conversations with intent two parties, namely the interviewer (interviewer) who asks the question and the interviewee (interviewee) who gave answers to questions.<sup>32</sup> In this case, the researcher used structured interview, where the interviewer sets the problem and the questions to be asked to seek answers to rigorously structured hypotheses.<sup>33</sup>

In carrying out interview techniques, the interviewer must be able to create good relationship so that informants are willing to work the same, and feel free to speak and be able to give actual information. Interview technique researcher use is structured that is by arranging some questions in advance which will be conveyed to the informant. This matter intended so that the talk in the interview is more directed and focused on the intended goal and avoid overly broad talk other. Than that also used as a general rule of thumb and can developed by researchers through questions that arise when the interview takes place.<sup>34</sup>

---

<sup>32</sup> Lexy. J. Moleong, *Metodologi Penelitian Kualitatif*, (Bandung: PT Remaja Rosdakarya, 2000), hlm. 135.

<sup>33</sup> Lexy. J. Moleong, *Metodologi Penelitian Kualitatif*, (Bandung: PT Remaja Rosdakarya, 2000), hlm.138.

<sup>34</sup> Suharsimi Arikunto, *Prosedur Penelitian Suatu Pendekatan Praktek*, (Jakarta : PT. Rineka Cipta, 2002, Cet.XII), hlm. 203.

The researcher did the interview for the student and teacher also. Interviews for students are used to find out why they made these mistakes. Meanwhile, interviews with teachers are used to collect data on how the teacher taught the English subject, what methods they use, what obstacles they encounter in the classroom during the teaching and learning process.

The interview consist of 10 questions, 5 questions for students and for the English teachers 5 questions.

#### 4. Documentation

Documentation, from the origin of the document that is means written items. In the implementation of the method documentation, researchers investigate written objects such as books, magazines, documents, regulations, meeting minutes, diaries and so on.<sup>35</sup> Through the documentation method, researchers use to explore data in the form of documents related to school history, facilities and infrastructure, documentary photos and so on.

### ***F. Instruments of the Research***

The instruments of the research are observation, test and interview. *First* the writer visited the school to conduct the research. Then, she was unstructured observation to know teaching learning process, the students' error in pronunciation. *Second* the researcher gave the test as the instrument of the research. The test will pronounce by the students one by one and the researcher

---

<sup>35</sup> Suharsimi Arikunto, *Prosedur Penelitian Suatu Pendekatan Praktek*, (Jakarta : PT. Rineka Cipta, 2002, Cet.XII), hlm.149.

will record that. *The last*, give interview for the students and the English teacher, the questions consist of 10, 5 question for the students and 5 more for the English teacher. To analyze the data the researcher use oxford dictionary, dictionary from John M. Echols and the researcher also use pronunciation application from smart phone.

#### **G. Procedures of data collection**

The data collected through the following procedures, namely:

1. The researcher asked the students to read the text.
2. One by one of the students read the text, while the researcher recorded their voices and interview the students.
3. The researcher interviewed the English teacher.
4. Then, the researcher analyzed the data collected.
5. Recording with the camera.

#### **H. Technique of Data Analysis**

The technique of data analysis used by the researcher in this research is descriptive analysis technique (percentage), which is described in the table percentage, the formula as follow:

$$P = \frac{F}{N} \times 100\%$$

P = Percentage

F = Frequency of error made

N = Number of samples which is observed<sup>36</sup>

**Table 1**

**Kinds of Error in Pronunciation**

## **CHAPTER IV**

### **RESEARCH FINDINGS**

This chapter consists of research finding which include general description and kinds of error made by the students.

#### **A. General description of SMP Astra Makmur Jaya**

##### **1. General history**

SMP Astra Mamkur Jaya founded in 01 July 2005, with a building area of 30.000 m<sup>2</sup>. SMP Astra Makmur Jaya is a private school owned by the Astra Agro Lestari. Tbk company, under the guidance of PT. Letawa but this school is not only for employees' children but also for community children.

##### **2. Vision and mission SMP Astra Makmur Jaya**

###### **a. Vision SMP Astra Makmur Jaya**

To be a superior school, concerned with safety, an environment based on character education and entrepreneurship.

###### **b. Mission SMP Astra Makmur Jaya**

- 1) Create an environment that supports the implementation of the learning process
- 2) Improve the quality and quantity of education and education personnel to meet the needs of school.
- 3) Realize graduates who excellent in believe and attitude (Imtaq) quality, achievement, character, independent, skilled, creative, and innovative.

4) Involve stakeholders in the process of developing a school insightful home environment.

3. Geographical location of SMP Astra Makmur Jaya

SMP Astra Makmur Jaya address at jl. Afd. Delta PT. Letawa, Makmur Jaya, Tikke Raya Kabupaten Pasangkayu Sulawesi Barat 94362.

4. Teacher and Education

a. Teacher

One important component in education process is the teacher. In the learning process, educators have an important role in relation to the success or failure of the learning process that it implements. Considering the magnitude of the functions and responsibilities of educators, each prospective educator is not only enough to capitalize a teacher's diploma, but must equip himself with a variety of skills that can support the implementation of the learning process, so that he can become a professional educator in carrying out his task.

b. Education

Education personnel have an important role in educational institutions, because they are aligned in making, management, regulation, filing, bookkeeping, and other important tasks.

5. Facilities and Infrastructure

**Table 4. facilities and infrastruktur**

No	Room	Less	Need	Total
1	Study room	0	13	13
2	Office			
3	Principal's office	0	1	1
4	Teacher's room	0	1	1
5	Library	0	1	1
6	Biology Laboratory	0	1	1

7	Language laboratory	0	1	1
8	Computer laboratory	0	1	1
9	Skills laboratory			
10	UKS	0	1	1
11	The Mosque	0	1	1
12	Student's toilet	2	6	4
13	Teacher's toilet	0	2	2
14	Warehouse	1	4	3

Facilities and infrastructure is one of the objects supporting the achievement of educational goals in the learning and teaching process. In the teaching process the teacher needs help in supporting learning activities. Beside the ability of teachers to manage learning activities, support from facilities and infrastructure is very important in helping teachers. More complete and adequate, facilities and infrastructure provided by schools will provide teachers in carrying out their duties as education personnel.

## B. Research Findings

Based on the research conducted in SMP Astra Makmur Jaya, the researcher got the data from the reading tests by 13 participants of 8<sup>th</sup> grade students of SMP Astra Makmur Jaya. The tests result 13 recorded pronunciation performances. The recording processes take place in different time and situation.

### 1. The error in pronouncing English vowels

Richards state, Error is a term referring to a performance that takes place when the deviation arises as a result of lack of knowledge. An error arises only when there was no intention to commit one.<sup>37</sup> Mistake is derivations due to performance factors such as memory limitation, fatigue, and emotional strain. Fauziati states that if the learners are able to correct a fault in their output, it is assumed that the form their selected was not the one intended, and shall said that the fault is a mistake.<sup>38</sup>

In this research the researcher do not interfere the participant's performance. The participants pronounced the word as their own. According to the research, the researcher found some errors made by the student of SMP Astra Makmur Jaya in pronouncing English vowel weather it is short and long

---

<sup>37</sup> J.C Richards, Op.cit.

<sup>38</sup> Fauziati. 2000. Reading on applied linguistics: *A Handbook for Language Teacher and Teacher Researcher*. Surakarta: Era Pustaka Utama.

vowels. For clear information, below are the table distributions of error of each description.

## 2. Types of error made by the students

This research found 92 total errors in pronouncing English vowel performed by 13 participants. The result show the participants performed substitution, insertion, and omission in their pronunciation. Below are classifications based on error arises in this research;

### a. Substitution

The participants perform substitution in most of error cases.

Noticeably, several causes involved the substitutions performed. In this

research reveal that there are four substitutions classified by its causes as follows;

1) Intralingual substitution

In interlingual error, I found several kinds of errors of students in pronouncing the words. They pronounced english words as a writtened. Below the displays vowel which are substance to intralingual substitution;

**Table 18 Intralingual substitution**

Vowel	Substitute	Error instance	Correct	Spelling
ə	ʌ	nʌʊ	/nəʊ/	Now
ʌ	ə	əs	/ʌs/	Us
u:	a:	na:dl	/nu:dl/	Noodle
ɑ:		kɜ:d	/kɑ:d/	Kard
ɪ	ə	ðə	/ðɪ/	The
i:	e	ezi	/i:zi/	Easy
e	i	Wil	/Wel/	Well
æ	e	ʌndə'stend	/ʌndə'stænd/	Understand

Likely, vowel /ə/, /ʌ/, /e/, and /ɪ/ are being the most problematic. The fact that, the vowel take over the most of the substitution which means that the problem lies in English spelling pronunciation mismatch. It is due to the different between English and first language system of the participants. Lack of knowledge is the

mainly reason of the participants runs against so many exceptions, which outweigh the rule.

The table above shows the most of the vowel are generalized by the participants. Like vowel /æ/ and /i:/ are generalized to /e/. By generalizing the spelling of letter 'a' in word such 'understand' /ʌndə'stænd/ and the second 'a' in 'easy' /i:zi/ as /ʌndə'stend/ and /Ezi/ in referring the /a/ in a word such 'many' /meni/.

## 2) Interlingual substitution

The table below displays vowel which are substance to interlingual;

**Table 19. Interlingual substitution**

Vowel	Substitute	Error instance	Correct	Spelling
ɪ	e	eŋlɪʃ	/ɪŋɡlɪʃ/	English
ʌ- ə	o	kolo(r)	/kʌlə(r)/	Color
ʌ	o	Lov	/lʌv/	Love
ə	o	noʊ	/nəʊ/	Now

This cases belong to interlingual substitution which is the substitution consider the Indonesian. The influence of first language spelling system mainly affects these substitutions. As known that, there is relationship between spelling and articulation in first language of the participants. Moreover most of the substitutions vowel /ʌ/, /ə/,

and /ɪ/ are unknown in first language system. Those the participants tend to pronounce the word regard as first language.

The participants commit spelling to sound in pronouncing the vowels. It is happen in the word such ‘love’, ‘now’ and ‘color’ pronounced with no doubt according to Indonesian spelling system like /lov/, /noʊ/, and /color/.

b. Insertion

Table below displays vowels which are substance to insertion;

**Table 20. Insertion**

Inserted vowel	Error instance	Correct use	Spelling
io	kwestʃion	/kwestʃən/	Question
ə	Stju:dənt	/stju:dnt/	Student

The vowel shown in the table above is being inserted by the participants the insertion mostly affected by first language of the participants. They seem to insert assist vowel to help them to pronounce. For example, the insertion of /e/ in the word ‘student’ pronounce as /stju:dənt/ instead of /stju:dnt/. Sometimes it creates an additional sound by the participants.

c. Omission

Table below displays vowel which are substance to omission;

**Table 21. Omission**

Vowel	Error instance	Correct use	Spelling
əʊ	bue	bəʊə	Both

3. Cause of Error Made by the Students

a. Carelessness

This is due to the lack of student learning motivation, usually due to the presentation of material that is not attractive so that students are not enthusiastic about participating in the lesson. This Also caused by a lack of student curiosity so they ignore the lesson.

b. First language

Also the cause of a big error is their native language, when they use English they bring the habit of their mother tongue into English.

c. Translation

This usually happens as the result of a situation when the learners are asked to communicate something but do not know the appropriate expressions or structures in the second language.

d. Feeling scared

The biggest problems with pronunciation are fear and insecurity.

They are too afraid to make mistakes in pronouncing a word or phrase that they think could embarrass themselves in public.

- e. Most of them do not really like english song because they do not understand the meaning. So there are students who can speak english well and some are less, because those who often listen to english song they get used to the pronunciation and different from those who do not like english song.

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### A. Conclusion

##### 1. Kinds of error made by the students

Pronunciation errors that occurred were not exclusively intended done by students. The percentage of English vowel errors, as follows; / ə / 25,27%; / i / 2,26%; / u / 4,61%; / ʌ / 15,38%; / ɪ / 12,22%; / e / 1,53%; / u: / 2,23%; / i: / 5,59%; / ɑ: / 5,76%; / æ / 0,76%; / ɒ / 3,07%; and / ɔ: / 1.53%. The results showed that the students made three kinds of pronunciation errors; substitution, insertion, and omission.

##### 2. Cause of error made by the students

Base on the researcher's assumption, those factors which could be considered to initiate the students to make errors in pronunciation are not only the student's first language, but frequency of English pronunciation practice is very lack, and the differences between English sound system with Indonesian sound system. There are certain reasons that explain why the errors can be happened when they are learning the language. If these errors are similar to the error that are made by learner who learning his or her first language, they are called intralingual error. Contrastively, if these errors are influenced by a learner's native language there are called interlingual error.

## B. Suggestion

From the conclusion above, the researcher would like to purpose some suggestion as follow;

1. Firstly, for the researcher, since the research has lacked of knowledge and far from being perfect and there are another factors that influence student's pronunciation, the researcher expects that there will be another researcher who will investigate the other factor relating to English pronunciation. The researcher also hopes that research will be useful as a reference to other who will conduct and develop a similar study.
2. Secondly, the students should learn more and practice every time, more listening practice, and the students also suggested to pay attention to their study of English, especially in pronunciation, in order to improve their competence in speaking. By this research the students should be aware of their error and try to overcome their problem of difficulties faced.
3. Thirdly, the department as the decision makes for the system applying in English learning and teaching should undertake some improvement and remedy. There should be a regular meeting to discuss the teaching method which takes the occurrence of pronunciation errors in the classroom activities.
4. Last, the teacher or model of this subject must be build the understanding and provide information that there is a different phonological system between English and Indonesian, so that they do not just accept the pronunciation of a word but they understand why it should be pronounced that way

### Reading text

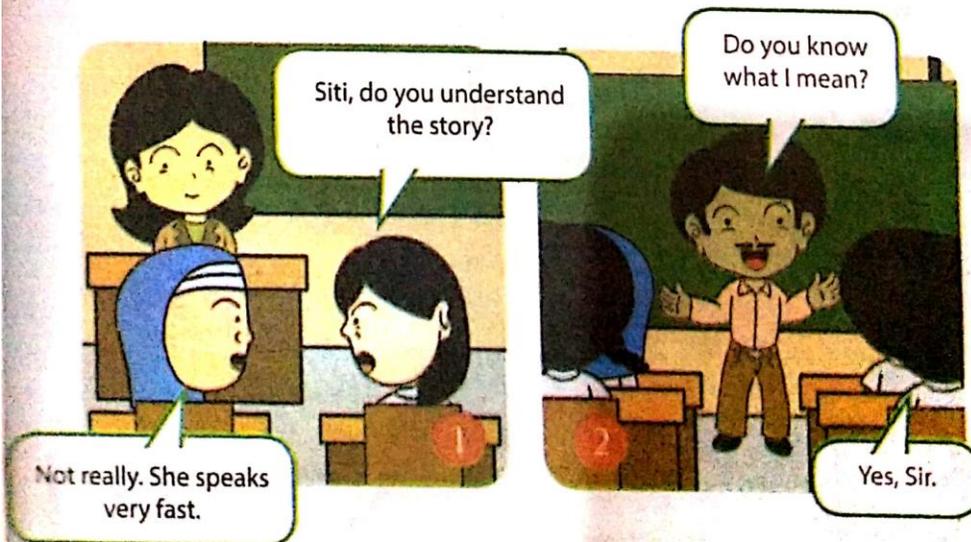

#### Observing & Asking Questions

We will play the roles of the students and the teachers in the conversations to check if they are understood.

Here are what we will do. **First**, we will listen carefully to our teacher reading the conversation. **Second**, we will repeat the conversation after him/her, sentence by sentence. **Then**, in groups we will play the roles of the speakers in the conversation.

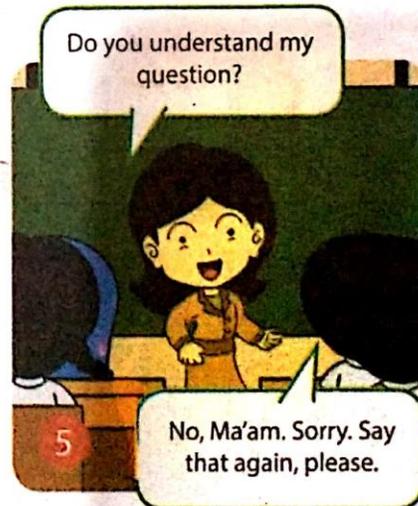

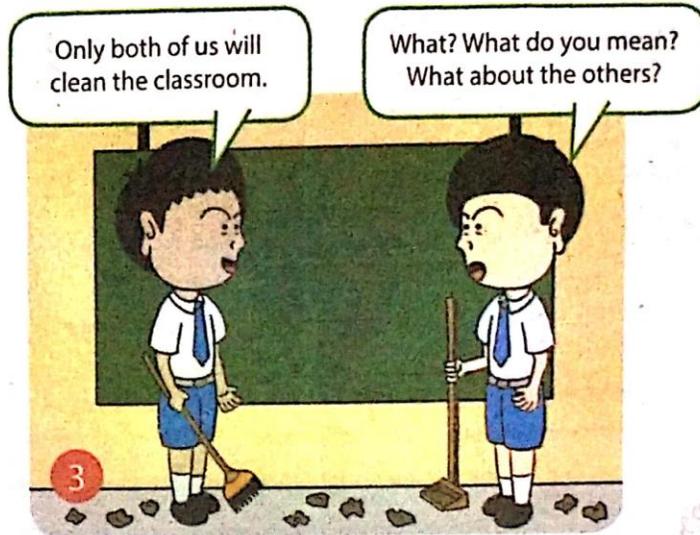

We will say the sentences loudly, clearly, and correctly.

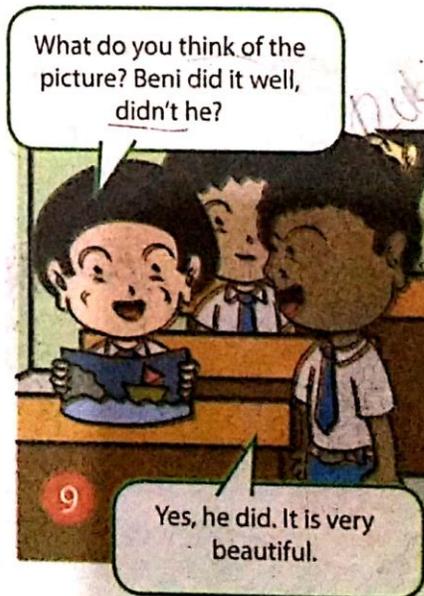

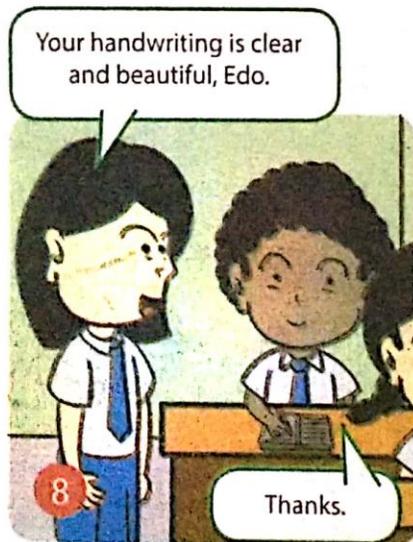

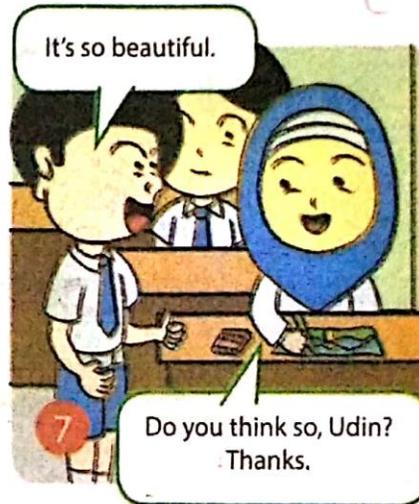

Observing & Asking Questions

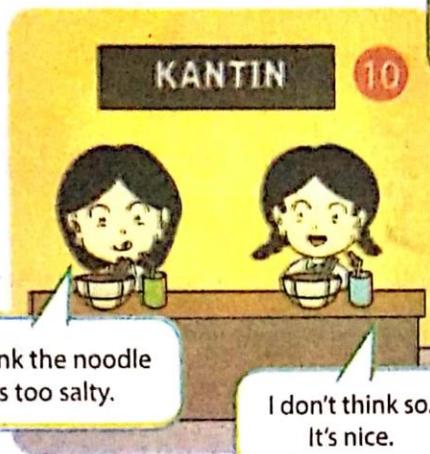

Observing & Asking Questions

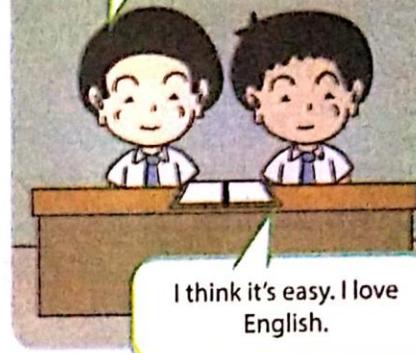

Observing & Asking Questions

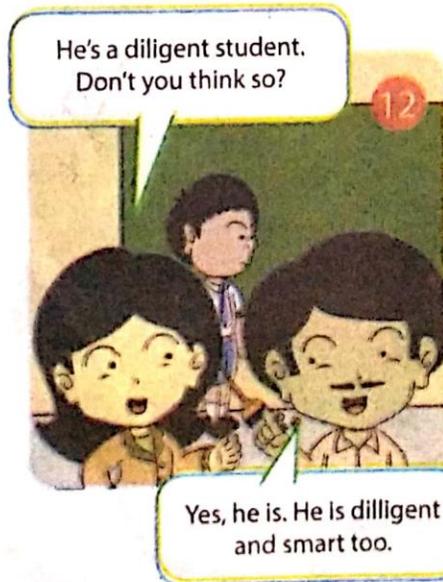

I think the noodle is too salty.

I don't think so. It's nice.

Beni, do you think English is easy or difficult?

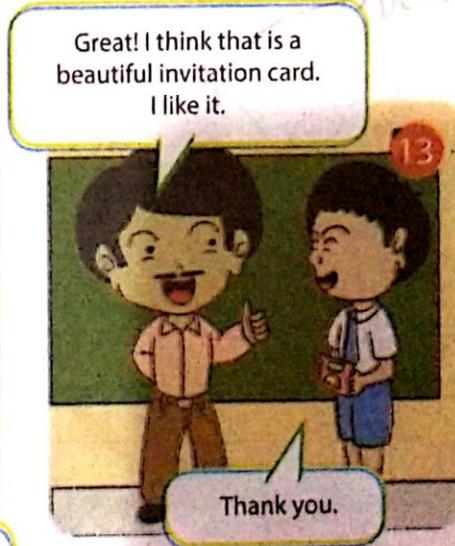

I think it's easy. I love English.

He's a diligent student. Don't you think so?

Yes, he is. He is diligent and smart too.

Great! I think that is a beautiful invitation card. I like it.

Thank you.

Observing & Asking Questions

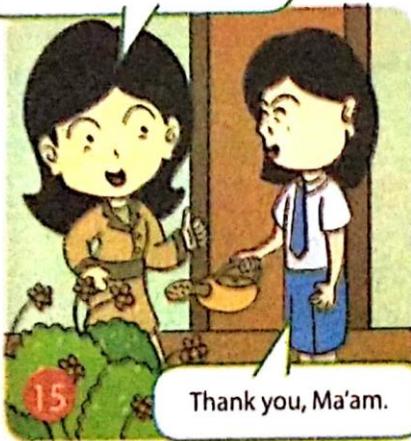

Your picture is beautiful!  
I like the color.

14

Thanks.

Excellent! That's my girl!

15

Thank you, Ma'am.

What a wonderful picture!

16

Thank you.

### **Appendix 3**

## **Guidance**

### **For Teacher:**

1. What is the method that teacher use in teaching english?
2. What are the difficulties did you find in teaching english?
3. What are the difficulties that students face in understanding pronunciation?
4. Solution that teacher ususally use when students get difficulties in understanding pronunciation?
5. How students respond in teaching class?

**For Students:**

1. Student opinion about english!
2. Student opinion about teacher method or strategy that teacher use in teaching english!
3. Student opinion about the teacher's attention when they do mistake in pronunciation.
4. What makes students difficult in pronunciation?
5. Do students like english song?

**Appendix 4****Teacher's answer for interview**

1. Direct method, kadang juga dibagi perkelompok dan sebagainya.
2. Tidak adanya fasilitas yang lengkap dalam lab bahasa, sehingga siswa tidak dapat belajar secara efektif di lab bahasa tersebut. Kurangnya minat belajar bahasa inggris siswa, karena kebanyakan dari mereka takut salah.
3. Mereka masih kesulitan dalam mengucapkan kata dalam bahasa inggir karena adanya perbedaan penyebutan dan tulisan dalam bahasa inggris.
4. Mengulang- ulang kata tersebut hingga siswa terbiasa mengucapkan dan juga mengajar dengan bermain games atau bercerita.
5. Sebagian ada yang bersemangat dan sebagian lagi sulit untuk mengucapkan, ada juga yang takut mencoba.

## **Student's answer for interview**

### **Student 01**

1. Susah, tapi saya suka belajar bahasa inggris.
2. Biasanya dia membacakan terlebih dahulu kemudian kami mengikutinya.
3. Bapak akan mengulangi dengan pengucapan yang benar sampai kami paham.
4. Bahasa inggris susah penyebutannya.
5. Ya, saya suka.

### **Student 02**

1. Bahasa inggris menyenangkan.
2. Bapak selalu mengucapkan terlebih dahulu dan kami mengikuti pengucapan itu.
3. Bapak selalu mengulang pengucapan kata yang belum kami pahami.
4. Pengucapannya lumayan susah.
5. Saya suka sekali mendengarkan lagu bahasa inggris.

### **Student 03**

1. Susah.
2. Bapak mengucapkan kemudian kami mengikutinya.

3. Mengulang kembali apa yang belum bisa kami ucapkan.
4. Susah diucapkan.
5. Suka, tapi tidak mengerti.

#### **Student 04**

1. Susah sekali
2. Bapak membacakan dan kami mengulangi kata tersebut
3. Mengajarkan kembali apa yang blum bisa kami ucapkan.
4. Susah diucapkan.
5. Tidak terlalu suka.

#### **Student 05**

1. Susah, tapi menyenangkan.
2. Bapak mengajarkan cara pengucapan dan kami mengikutinya.
3. Mengulangi pengucapan yang salah.
4. Pengucapannya susah.
5. Suka, tapi jarang mendengarkan.

### **Student 06**

1. Susah, beda ucapan dan tulisannya.
2. Diajarkan cara mengucapkan dan kami mengulangi.
3. Mengulangi apa yang blum kami pahami.
4. Susah diucapkan.
5. Suka.

### **Student 07**

1. Menyenangkan.
2. Bapak mengajarkan cara penyebutannya dan kami mengikutinya.
3. Mengulangi pengucapan yang sulit bagi kami.
4. Susah disebutkan.
5. Suka.

### **Student 08**

1. Susah-susah gampang.
2. Diajarkan terlebih dahulu dan kami mengikutinya.
3. Mengajarkan kembali yang sulit kami ucapkan.
4. Penyebutannya lumayan sulit.
5. Suka.

**Student 09**

1. Susah sekali.
2. Diajarkan cara mengucapkan dan kami mengikutinya.
3. Mengucapkan kembali yang blum dapat kami ucapkan.
4. Susah diucapkan karena berbeda tulisan dan bacaanya.
5. Suka

**Student 10**

1. Tidak tahu artinya.
2. Bapak mengucapkan dan kami mengikutinya.
3. Mengulangi pengucapan yang salah.
4. Susah disebutkan.
5. Tidak terlalu.

**Student 11**

1. Menyenangkan.
2. Diajarkan cara mengucapkan dan kami mengulangi pengucapannya.
3. Mengulang kembali pengucapan yang sulit kami ucapkan.
4. Lumayan sulit pengucapannya, apalagi pengucapan kata yang belum pernah saya dengar sebelumnya.
5. Suka sekali.

### **Student 12**

1. Susah tapi menyenangkan.
2. Diajarkan terlebih dahulu lalu kami mengulangi pengucapannya.
3. Mengulangi pengucapan yang sulit kami ucapkan tau tidak kami ketahui cara pengucapannya.
4. Sulit diucapkan.
5. Suka sekali.

### **Student 13**

1. Menyenangkan sekali.
2. Diajarkan cara megucapkan dan kami mengulangi pengucapan tersebut.
3. Mengulangi kaya yang blum dapat kami ucapkan.
4. Pengucapannya lumayan sulit.
5. Suka sekali.
